Software created by Team2 Software has achieved very good reputation both among users and professional press. Below you can find just a few of many comments about our activity.

List of TOP 10 FREEWARE by PC World Komputer about Zajączek.

Zajączek – our advanced WWW sites creating tool took 3rd position thanks to readers votes.

PC World Komputer about eSeMeS

"Complex SMS manager with a convenient interface like the one of Outlook Express. It is able to send short messages to all GSM networks, as well as e-mails. This tool includes phonebook where one can have numbers of all his or her friends."

CHIP - Zajączek

"In my opinion this is one of the most complex polish HTML editors. It is very convenient. Definitely makes webmasters' work easier and faster."

Internet Magazine - Zajączek

"It can surely be regarded as one of the most complex HTML editors in Poland. We congratulate author on successful premiere and are looking forward to future, better and better versions."

PC World Komputer - WinPS

"There is no doubt that WinPS will be enjoyed by many programmers, since lost and hard to shut down processes are common problems while testing new software."

Internet Magazine - JSBuilder 1.0

"It's work style and user interface have been built on the model of Delphi. Attractivity of this program is defined by huge configuration possibilities and stability."

PC Format - Encyklopedia Zjawisk Paranormalnych

"It is not about seeking cheap sensation. Authors try to give us definition of unexplained phenomena and they do it in a accessible way, based on current knowledge. Big advantage of this encyclopedia is huge amount of pictures. Therefore one can see Nazca Plateau or famous "face" on Mars."

PC Format - AMIGO Text Manipulating Program

"Small program, I had pleasure to use. This is a highly complex editor designed for webmasters, programmers, editors and others who cope with text editing."

PC Format - JSBuilder

"JSBuilder's interface is based on modules and that's is a great idea. [...] One of the most interesting functions is a tool converting from Pascal to JavaScript. Editor works without problems. There is implemented a special mechanism, which helps to avoid semantic problems."
